

INTEL® TRANSFORMING LEARNING

Introduction to Personalized Learning in the Digital Classroom

Syllabus

Course Description

This course is designed to help today's educators better understand the practice of personalized learning. Implementing this approach requires a considerable paradigm shift from the traditional "one-size-fits-all" approach to education. Personalized learning is specifically tailored to each student's strengths, needs, and interests while ensuring the highest standards possible.

Introduction: Course Objectives

Module 1

- What is Personalized Learning?
- Breaking with Tradition
- Personalized Learning in the Classroom
- Personalized Learning Characteristics Checklist

Module 2

- Differentiated, Individualized, and Personalized Learning
- Differentiated, Individualized, and Personalized Learning Overview and Definitions
- Roadmap task

Module 3

- How Does Technology Support Personalized Learning?
- Using Technology to Further Personalization
- Roadmap task

Module 4

- What is SAMR?
- Explore the Basics
- SAMR Lesson Modification Activity

Module 5

- What is Personalized Learning?
- Using Personalized Learning
- Scenarios
- Roadmap task

Conclusion
