# Powering Award-Winning WordPress Digital Experiences with Intel on Google Cloud Platform

WP Engine is the leading digital experience platform for WordPress. With a combination of tech innovation and an award-winning team of WordPress experts, WP Engine helps create world-class digital experiences for more than 120,000 companies across 150 countries. WP Engine powers some of its WordPress Digital Experience Platform services with 2nd Gen Intel® Xeon® Scalable processor-based “C2” (compute optimized) instances on Google Cloud Platform. WP Engine also takes advantage of Intel-based GCP “Live Migration” instances to run VMs with zero planned downtime, regardless of system maintenance, micro-code updates, and other events that might take place. All of this combines to make WP Engine a leader in performant infrastructure among WordPress platforms today.
